

I Claim:

1. An organizer attachment for a vehicle sun visor having inside and outside major visor surfaces, the sun visor being pivotable between a raised position wherein the inside visor surface resides adjacent an interior ceiling of the vehicle and a lowered position wherein the outside visor surface resides adjacent a front windshield of the vehicle, said organizer attachment comprising:

- (a) an organizer panel having opposing inside and outside major panel surfaces, at least one of said inside and outside panel surfaces defining an object storage area;
- (b) at least one strap adapted for extending across at least one of the inside and outside major visor surfaces of the sun visor;
- (c) a fastener wrap attached to said at least one strap, and including releasable fastener means for engaging and releasably securing said organizer panel to the vehicle sun visor; and
- (d) means located in said object storage area for carrying objects for ready access and use by an occupant of the vehicle.

2. An organizer attachment according to claim 1, wherein said inside and outside panel surfaces of said organizer panel define respective first and second object storage areas for carrying objects for ready access and use by an occupant of the vehicle.

3. An organizer attachment according to claim 1, and comprising a second organizer panel attached along a longitudinal edge of said first organizer panel, and having opposing inside and outside major panel surfaces comprising respective second and third object storage areas, said second organizer panel adapted for pivoting movement between a closed position wherein said second object storage area overlies said first object storage area, and an open position for accessing each of said first and second object storage areas, and said third object storage area being accessible in both the open and closed positions of said second organizer panel.
4. An organizer attachment according to claim 3, and including means for releasably holding the second organizer panel in the closed position.
5. An organizer attachment according to claim 1, wherein said means for carrying objects comprises a plurality of sleeves adapted for receiving and storing respective compact discs.
6. An organizer attachment according to claim 1, wherein said means for carrying objects comprises a plurality of utility pockets each having an elastic opening adapted for receiving and storing objects.

7. An organizer attachment according to claim 6, wherein said elastic opening extends along a lateral dimension of said organizer panel.
8. An organizer attachment for a vehicle sun visor having inside and outside major visor surfaces, the sun visor being pivotable between a raised position wherein the inside visor surface resides adjacent an interior ceiling of the vehicle and a lowered position wherein the outside visor surface resides adjacent a front windshield of the vehicle, said organizer attachment comprising:
 - (a) an organizer panel having opposing inside and outside major panel surfaces, said inside and outside panel surfaces defining respective first and second object storage areas;
 - (b) at least one of said inside and outside major panel surfaces comprising releasable fastener means adapted for mating with complementary fastener means carried by the sun visor, such that said organizer panel is readily removed from the sun visor for transport outside of the vehicle; and
 - (c) means located in said first and second object storage areas for carrying objects for ready access and use by an occupant of the vehicle.
9. An organizer attachment according to claim 8, wherein said means for carrying objects comprises a plurality of sleeves adapted for receiving and storing respective compact discs.

10. An organizer attachment according to claim 8, wherein said means for carrying objects comprises a plurality of utility pockets each having an elastic opening adapted for receiving and storing objects.

11. An organizer attachment according to claim 10, wherein said elastic opening extends along a lateral dimension of said organizer panel.

12. An organizer attachment for a vehicle sun visor having inside and outside major visor surfaces, the sun visor being pivotable between a raised position wherein the inside visor surface resides adjacent an interior ceiling of the vehicle and a lowered position wherein the outside visor surface resides adjacent a front windshield of the vehicle, said organizer attachment comprising:

- (a) an organizer panel having opposing inside and outside major panel surfaces, at least one of said inside and outside panel surfaces defining an object storage area;
- (b) at least one strap separate from said organizer panel and adapted for being attached to the sun visor, said at least one strap comprising one of male and female fastener means for releasably mating with complementary fastener means carried by said organizer panel, such that said organizer panel is readily removed from

the sun visor for transport outside of the vehicle; and

(c) means located in said object storage area for carrying objects for ready access and use by an occupant of the vehicle.

13. An organizer attachment according to claim 12, wherein said means for carrying objects comprises a plurality of sleeves adapted for receiving and storing respective compact discs.

14. An organizer attachment according to claim 12, wherein said means for carrying objects comprises a plurality of utility pockets each having an elastic opening adapted for receiving and storing objects.

15. An organizer attachment according to claim 14, wherein said elastic opening extends along a lateral dimension of said organizer panel.

16. An organizer attachment according to claim 12, and comprising a second organizer panel attached along a longitudinal edge of said first organizer panel, and having opposing inside and outside major panel surfaces comprising respective second and third object storage areas, said second organizer panel adapted for pivoting

movement between a closed position wherein said second object storage area overlies said first object storage area, and an open position for accessing each of said first and second object storage areas, and said third object storage area being accessible in both the open and closed positions of said second organizer panel.

17. An organizer attachment according to claim 16, and including means for releasably holding the second organizer panel in the closed position.
18. An organizer attachment according to claim 16, and comprising means located in said second and third object storage area for carrying objects for ready access and use by an occupant of the vehicle.
19. An organizer attachment according to claim 18, wherein said means for carrying objects comprises a plurality of sleeves adapted for receiving and storing respective compact discs.

20. An organizer attachment according to claim 18, wherein said means for carrying objects comprises a plurality of utility pockets each having an elastic opening adapted for receiving and storing objects.
